Scored Patient-Generated Subjective Global Assessment (PG-SGA)

Global Assessment (PG-SGA)	James, Ruben
History (Boxes 1-4 are designed to be completed by the patient.)	
1. Weight (See Worksheet 1)	Food Intake: As compared to my normal intake, I would rate my food intake during the past month as:
In summary of my current and recent weight:	☐ more than usual (0)
I currently weigh about 150 pounds	less than usual (1)
I am about feet / O tall	I am now taking:
440	pormal food but less than normal amount (1)
One month ago I weighed about/ 40 pounds	little solid food (2)
Six months ago I weighed about pounds	only liquids (1)
man and the state of the state	only nutritional supp tements (1)
During the past two weeks my weight has:	very little of anything (e) only tube feedings or only nutrition by vein on
decreased (i) not changed (ii) 12 increased (iii)	Box 2 /
Dix 1	*·
3. Symptoms: I have had the following problems that have kept	4. Activities and Function: Over the past month, I
me from eating enough during the past two weeks (check all	would generally rate my activity as:
that apply):	normal with no limitations (0)
no problems eating (0)	not my normal self, but able to be up and
no appetite, just did not feel like eating (3)	about with fairly normal activities
nausea (i) vomiting (i)	not feeling up to most things, but in bed or chair
Constipation diarrhea (3)	less than half the day (2)
mouth sores (2)	able to do litt le activity and spend most
l	
,,,,	of the day in bed or chair (3)
pain; where?	pretty much bedridden, rarely out of bed (1) Box 4
Other** (1)	
** Examples: depression, money, or dental problems Box 3	Additive Score of the Boxes 1-4 A
The remainder of this form will be completed by yo	our doctor, nurse, or therapist. Thank you.
5. Disease and its relation to nutritional requirements (See Work All relevant diagnoses (specify)	sheet 2)
7 III 1010 VIIII GINGS (SPECIA)	
Primary disease stage (circle if known or appropriate) 1 II II	
Age 6. Metabolic Demand (See Worksheet 3)	Numerical score from Worksheet 2 B
G. Michaelle Deliand (SEE Worksheet Sy	Numerical score from Worksheet 3 C
7. Physical (See Worksheet 4)	Numerical score from Worksbeet 4 D
Global Assessment (See Worksheet 5)	Total PG-SGA score
☐ Well-nourished or anabolic (SGA-A)	
☐ Moderate or suspected malnutrition (SGA-B)	(,,,,,
Severely malnourished (SGA-C)	(See triage recommendations below)

2-3 Patient & family education by dietitian, nurse, or other clini	ician with pharmacologic intervention as indicated by symptom.
	town to the burning of the motter and to the terror of a birthour
survey (Box 3) and laboratory values as appropriate. 4-8 Requires intervention by dietitian, in conjunction with nurse	

Patient ID Information

Boxes 1-4 of the PG-SGA are designed to be completed by the patient. The PG-SGA numerical score is determined using

1) the parenthetical points noted in boxes 1-4 and 2) the worksheets below for items not marked with parenthetical points. Scores for boxes 1 and 3 are additive within each box and scores for boxes 2 and 4 are based on the highest scored item checked off by the patient.

Worksheet 1 - Scoring Weight (Wt) Loss

To determine score, use 1 month weight data if available. Use 6 month data only if there is no 1 month weight data. Use points below to score weight change and add one extra point if patient has lost weight during the past 2 weeks. Enter total point score in Box 1 of the PG-SGA.

Wt loss in 1 month	Points	Wt loss in 6 months
10% or greater	4	20% or greater
5-9.9%	3	10 -19.9%
3-4.9%	2	6 - 9.9%
2-2.9%	1	2 - 5.9%
0-1.9%	0	0 - 1.9%

Score for Worksheet 1 C Record in Box 1 Worksheet 2 - Scoring Criteria for Condition

Score is derived by adding 1 point for each of the conditions listed below that pertain to the patient.

Category
Cancer
AIDS
Pulmonary or cardiac cachexia
Presence of decubitus, open wound, or fistula
Presence of trauma
Age greater than 65 years

Score for Worksheet 2 = Record in Box B

Worksheet 3 - Scoring Metabolic Stress

Score for metabolic stress is determined by a number of variables known to increase protein & calorie needs. The score is additive so that a patient who has a fever of > 102 degrees (3 points) and is on 10 mg of prednisone chronically (2 points) would have an additive score for this section of 5 points.

none (0) low (1) moderate (2) high (3) Stress ≥101 and <102 >99 and <101 ≥102 Fever no fever Fever duration no fever <72 hrs 72 hrs > 72 hrs moderate dose high dose steroids Steroids no stemids low dose (>10 and <30mg (<10mg prednisone (≥30mg prednisone equivalents/day) prednisone equivalents/day) equivalents/day)

Score for Worksheet 3 = Record in Box C

Worksheet 4 - Physical Examination

Physical exam includes a subjective evaluation of 3 aspects of body composition: fat, muscle, & fluid status. Since this is subjective, each aspect of the exam is rated for degree of deficit. Muscle deficit impacts—point score more than fat deficit. Definition of categories: 0 = no deficit, 1+ = mild deficit, 2+ = moderate deficit, 3+ = severe deficit. Rating of deficit in these categories are not additive but are used to clinically assess the degree of deficit (or presence of excess fluid).

Fat Stores:				
orbital fat pads	10	1+	(24	3+
triceps skin fold	0	1+	(2 -))	3+
fat overlying lower ribs	0	+1	₽)	3+
Global fat deficit rating	0	1+	€	3+
Muscle Status:			(D)	
temples (temporalis muscle)	0	1+	(2+)	3+
clavicles (pectoralis & deltoids)	0	1+	(2+)	3+
shoulders (deltoids)	0	1+	24	3±
interesseous muscles	0	1+	2+	(3+)
scapula (tatissimus dorsi, trapezius, deltoids)	0	(1+)	2+	37
thigh (quadriceps)	0	77	2+	(3±)
calf (gastrocnemius)	0	1+	2+	(34)
Global muscle status rating	•	1+	2+	₹

Point score for the physical exam is determined by the overall						
Global fizid s	1+	2+	3 +)			
ascites	(1+	2+	3+		
sacral ederna	•	1+	(2+)	3+		
ankie edema	0	1+	2±_	(3+)		
Fluid Status:						

subjective rating of total body deficit.

No deficit score = 0 points

Mild deficit score = 1 point

Moderate deficit score = 2 points

Severe deficit score = 3 points

Score for Worksheet 4
Record in Box D

Worksheet 5 - PG-SGA Global Assessment Categories Stage A Stage B Stage C Well-nourished Severely malnourished Category Moderately malnourished or suspected malnutrition Weight No wt loss OR ~5% wt loss within 1 month > 5% wt loss in 1 month Recent non-fluid wt gain (or 10% in 6 months) OR (or >10% in 6 months) OR No we stabilization or we gain No we stabilization or we gain (i.e., continued wt loss) (i.e., continued wt loss) Nutrient Intake No deficit OR Definite decrease in intake Severe deficit in intake Significant recent improvement None OR Presence of nutrition impact Presence of nutrition impact Nutrition Impact symptoms (Box 3 of PG-SGA) Significant recent improvement symptoms (Box 3 of PG-SGA) Symptoms allowing adequate intake No deficit OR Moderate functional deficit OR Functioning Severe functional deficit OR Significant recent improvement Recent deterioration recent significant deterioration Physical Exam No deficit OR Evidence of mild to moderate Obvious signs of malnutrition Chronic deficit but with recent loss of SQ fat &/or muscle mass (e.g., severe loss of SO tissues. clinical improvement &/or muscle sone on palpation possible ederna) Global PG-SGA rating (A, B, or C)
