

## THE FEMALE GENITAL SYSTEM AND BREAST

Lichen sclerosus

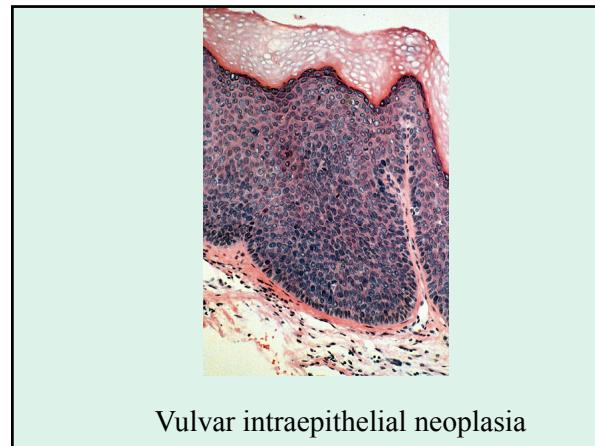

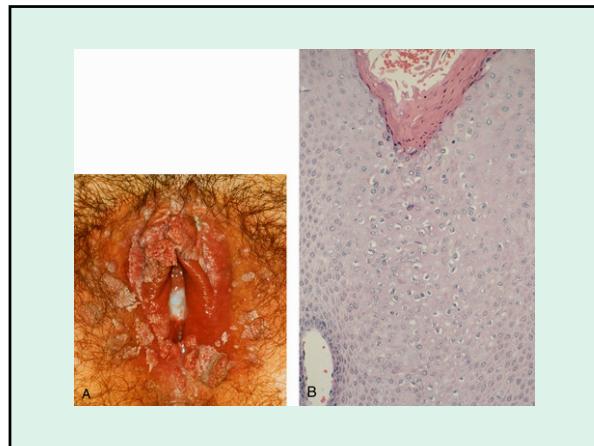

Lichen sclerosus

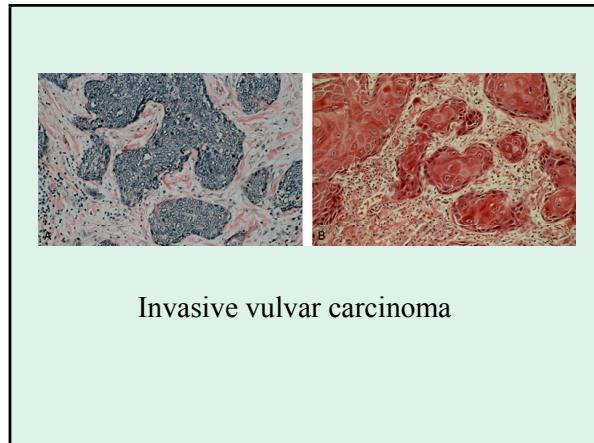

Squamous hyperplasia

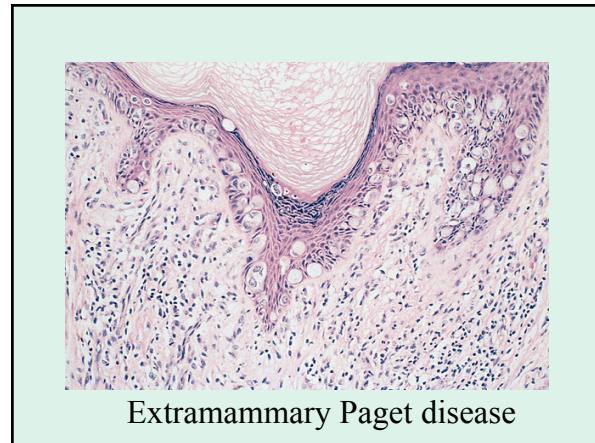

Condylomas and Low-Grade Vulvar Intraepithelial Neoplasia

Vulvar intraepithelial neoplasia

Invasive vulvar carcinoma

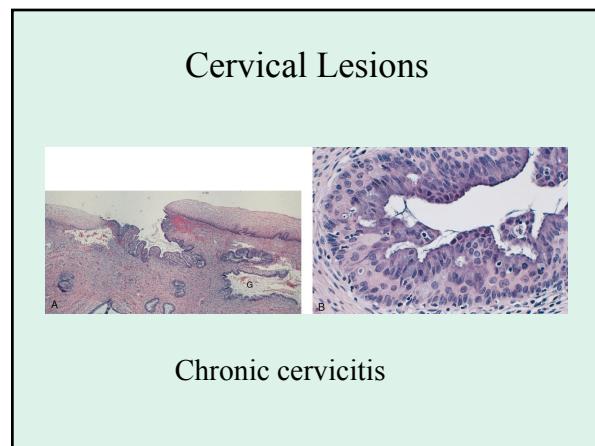

Extramammary Paget disease

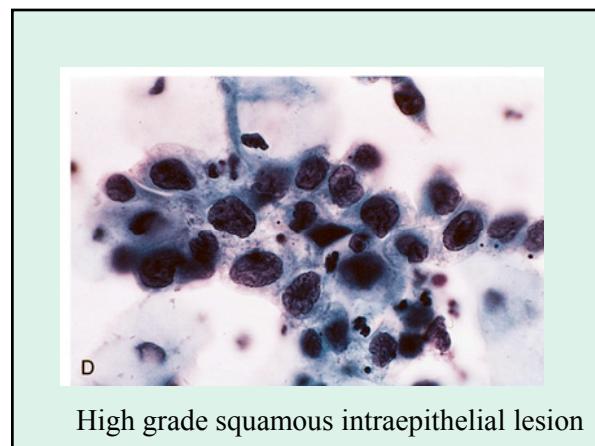

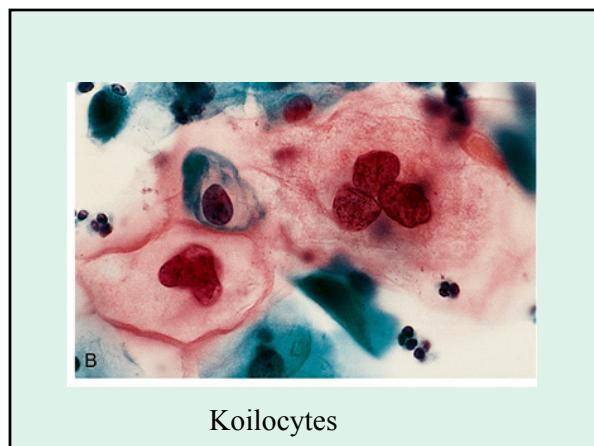

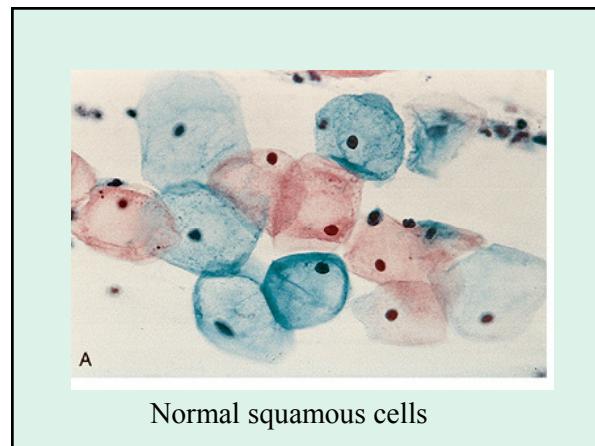

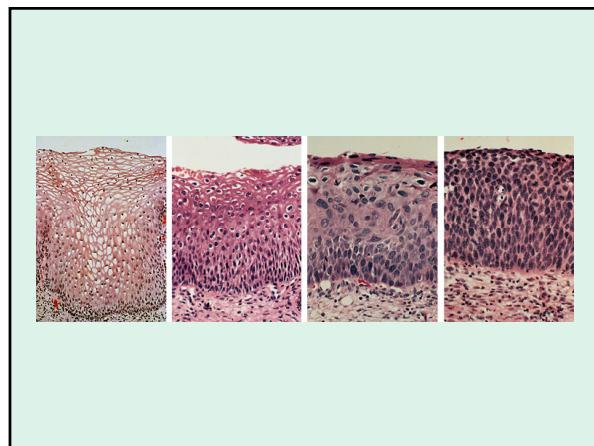

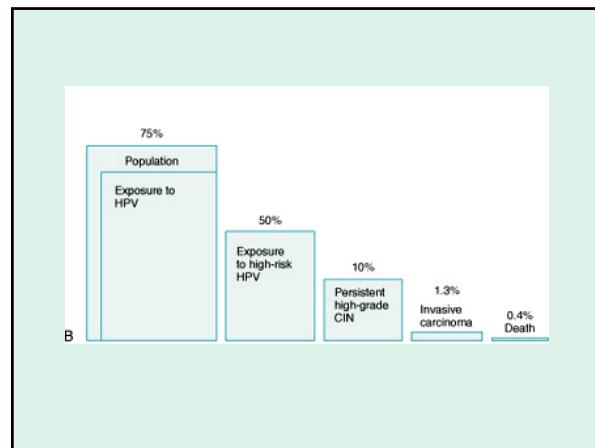

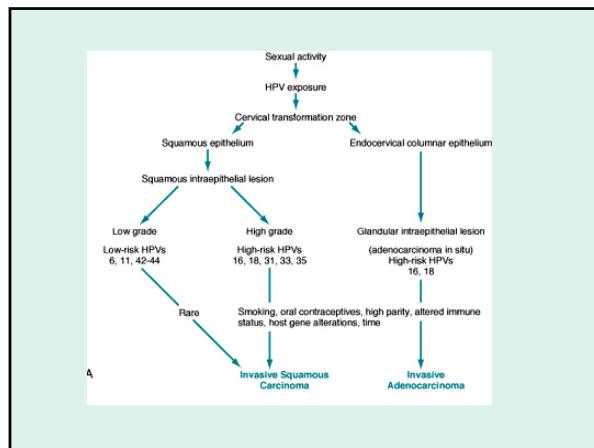

Vaginal Tumors

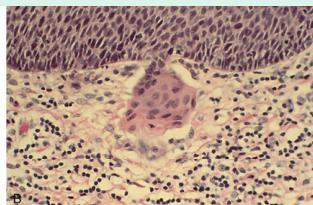

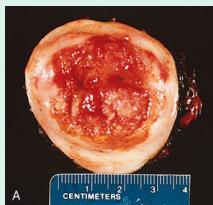

Sarcoma botryoides  
embryonal rhabdomyosarcoma

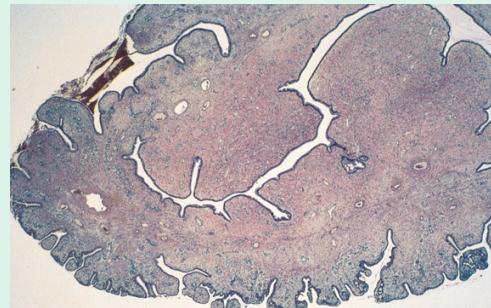

Cervical Lesions

Chronic cervicitis

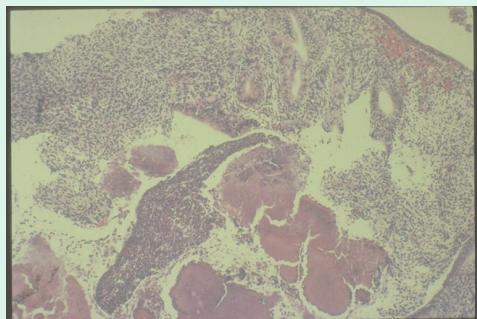

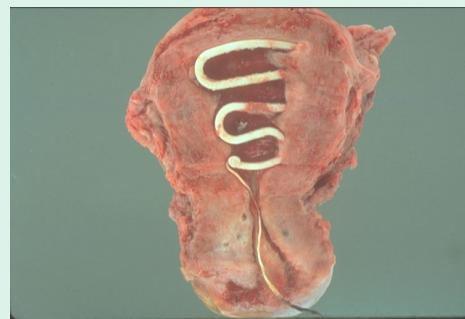

Invasive cervical cancer

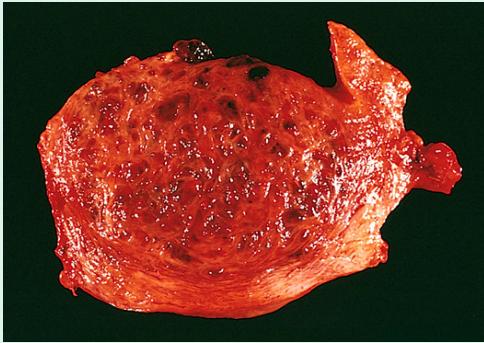

Endocervical polyp

## ENDOMETRITIS

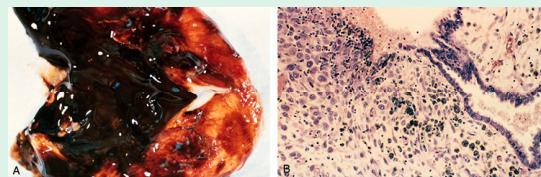

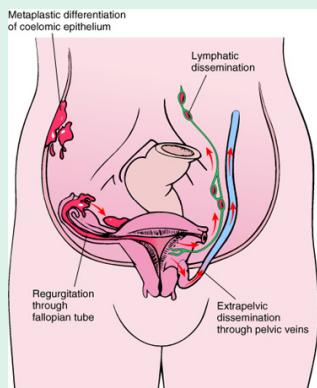

Actinomyces

## ADENOMYOSIS

Adenomyosis

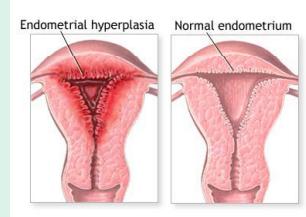

## ENDOMETRIOSIS

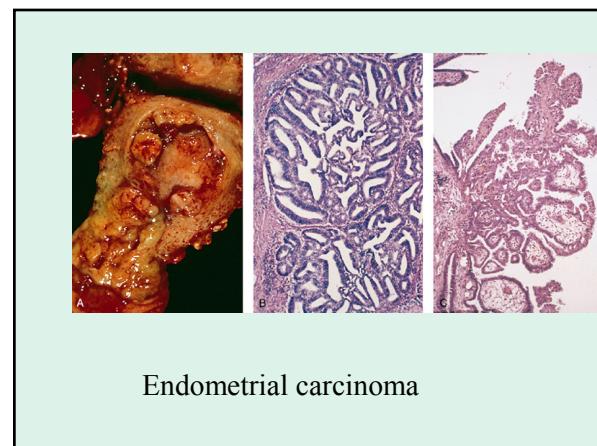

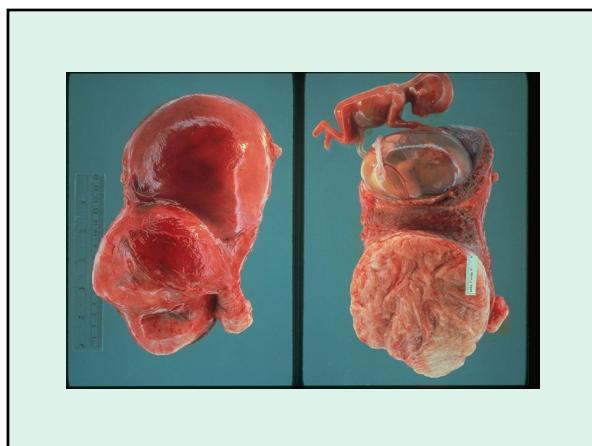

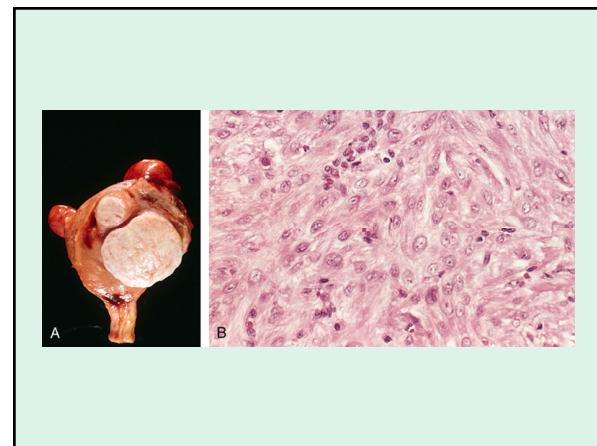

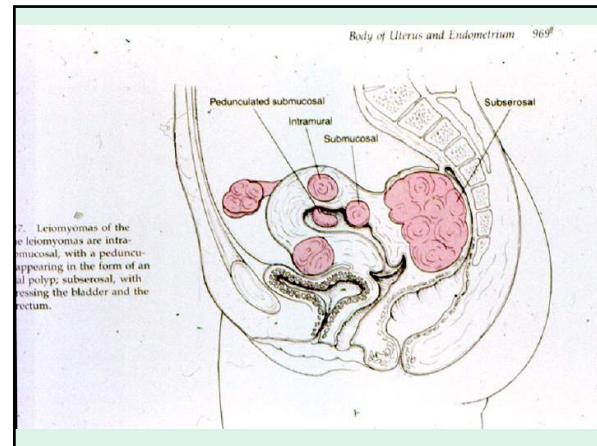

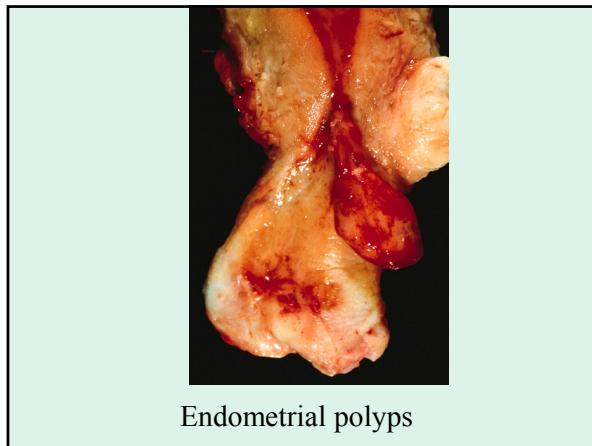

## DYSFUNCTIONAL UTERINE BLEEDING

## ENDOMETRIAL HYPERPLASIA

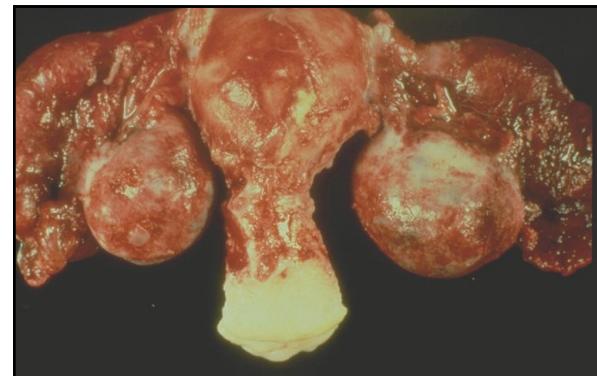

- Estrogen stimulation

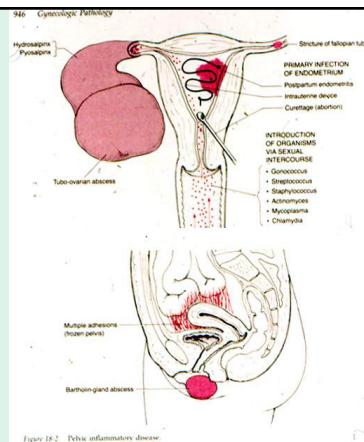

©ADAM

## FALLOPIAN TUBES

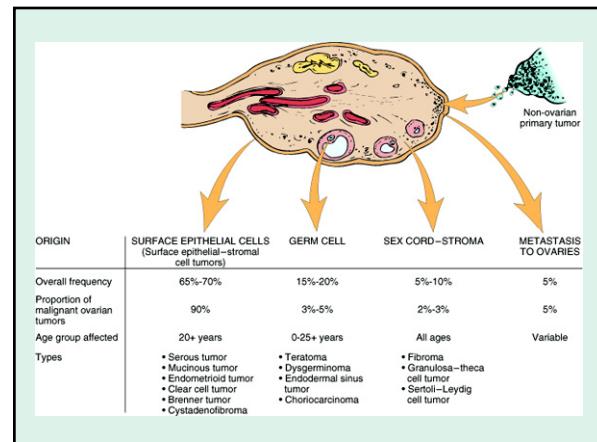

PELVIC INFLAMMATORY DISEASE

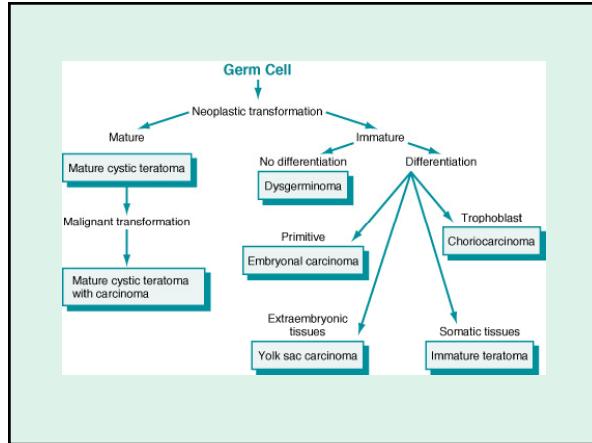

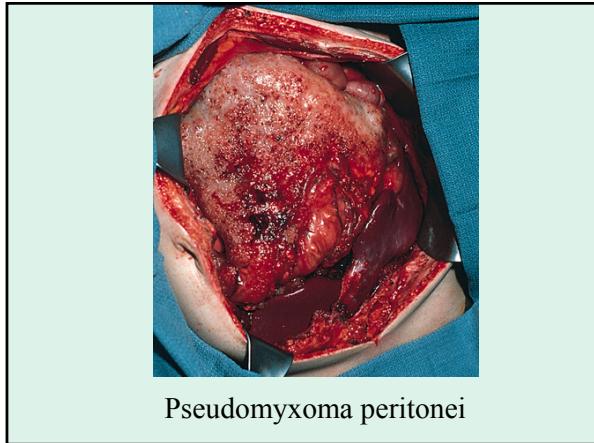

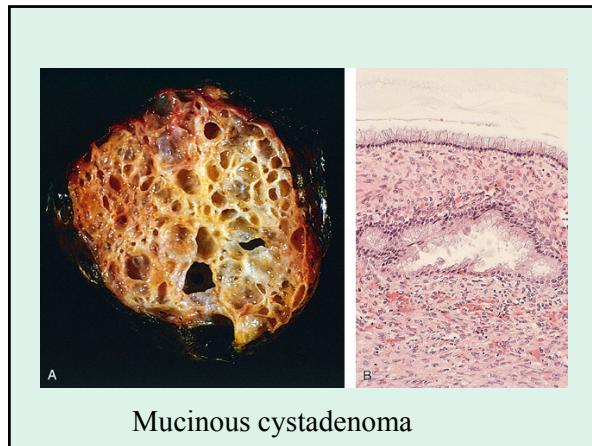

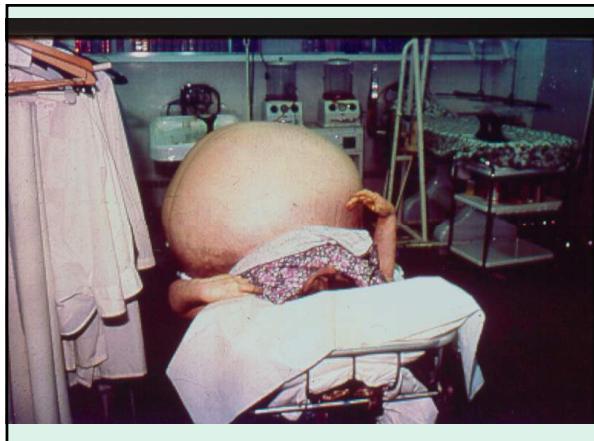

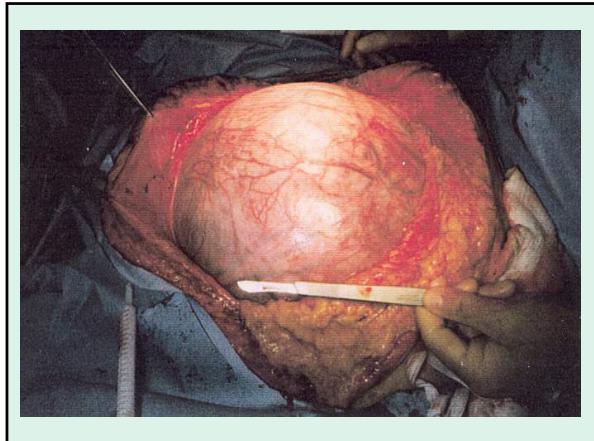

## OVARIES

Polycystic ovaries

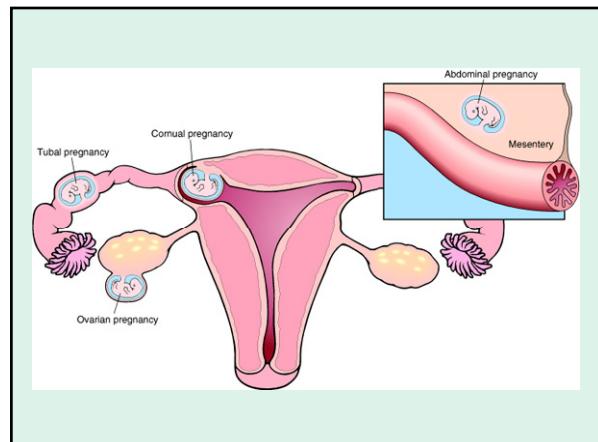

### Clinical Correlation

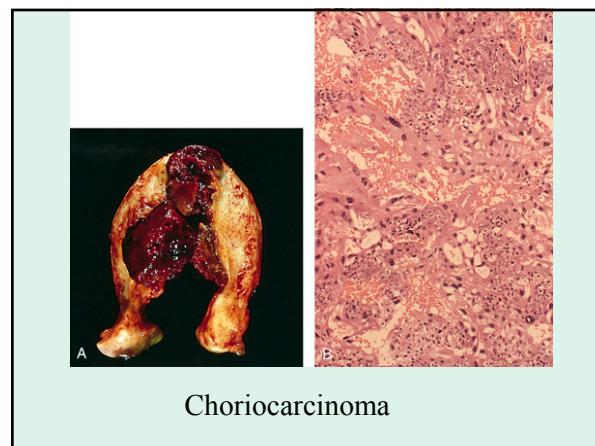

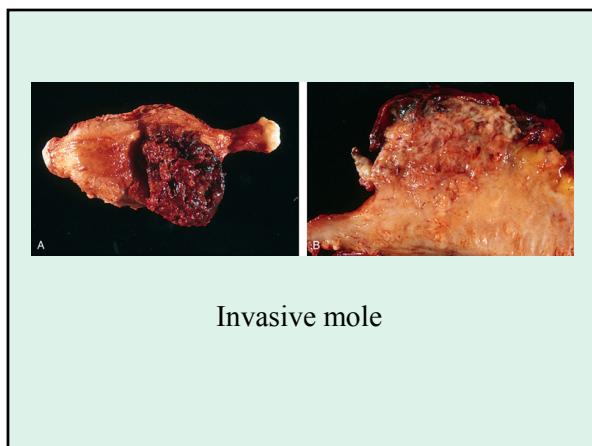

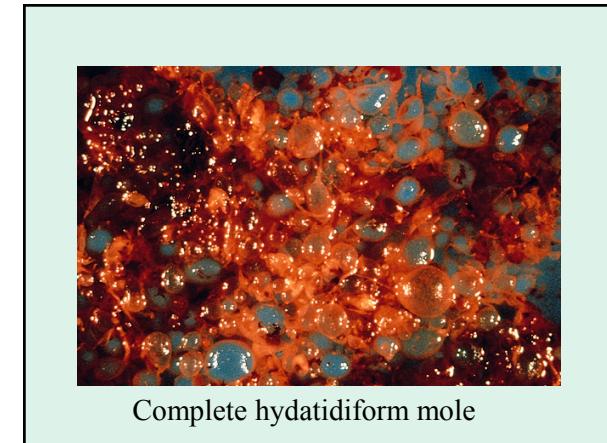

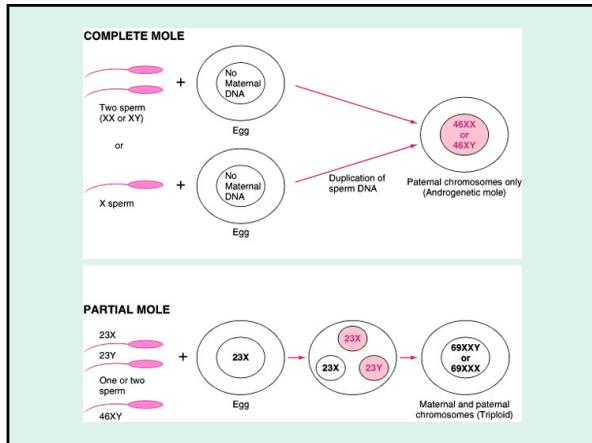

- Asymptomatic
- Pain
- Gastrointestinal complaints
- Urinary frequency
- Increase abdominal girth

Placental inflammations and infections

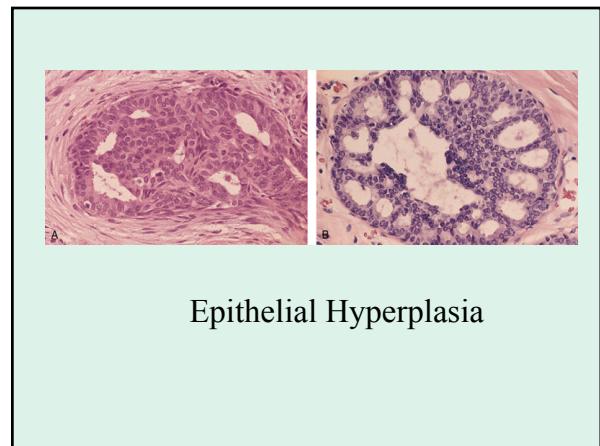

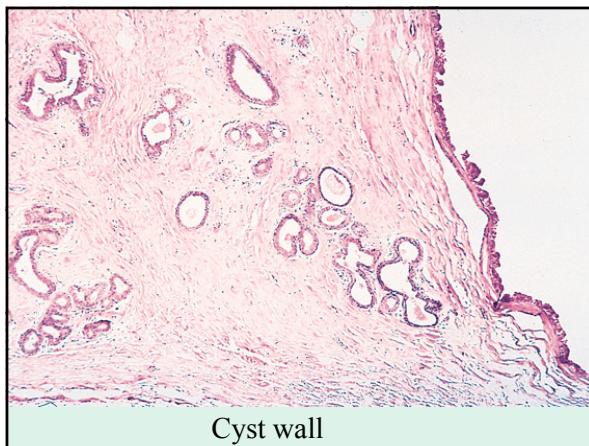

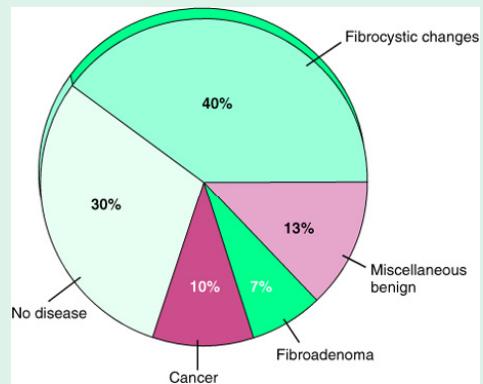

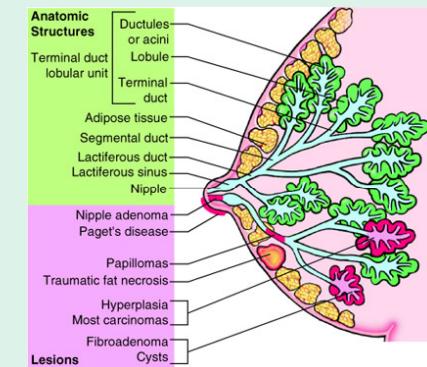

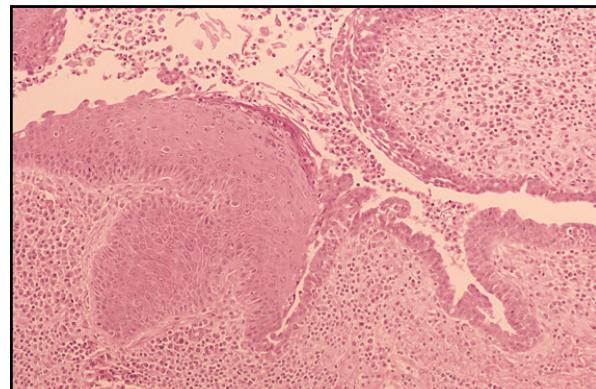

## Hydatidiform Mole: Complete and Partial

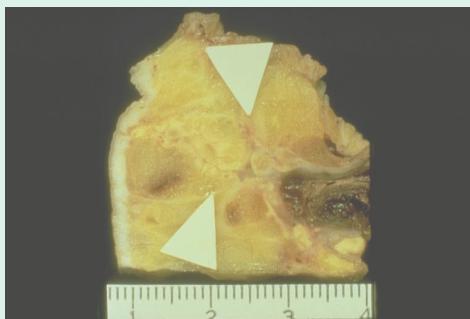

# Breast

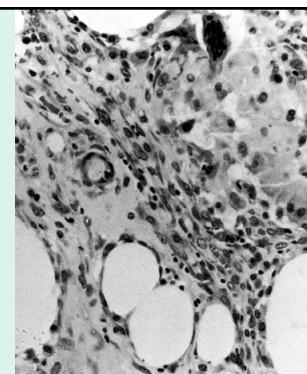

Inflammation of the Breast

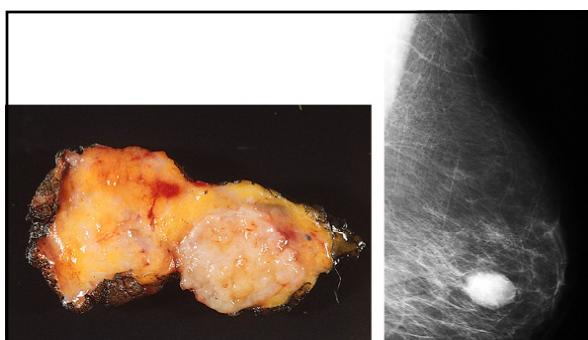

Mammary duct ectasia

Fat necrosis

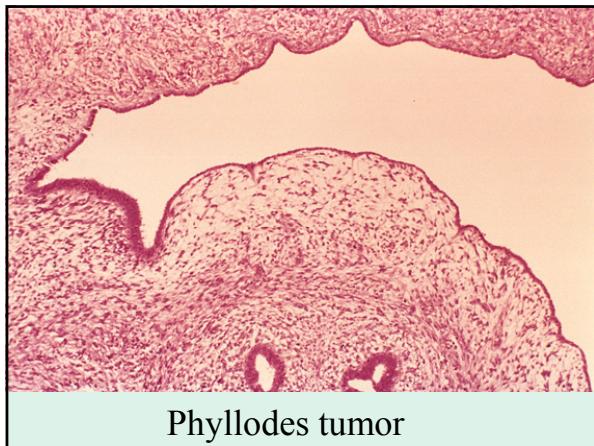

Fat necrosis

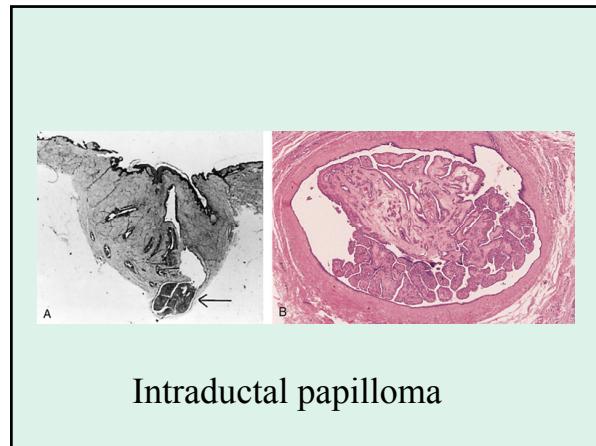

Fibroadenoma

Cystosarcoma phyllodes

Phyllodes tumor

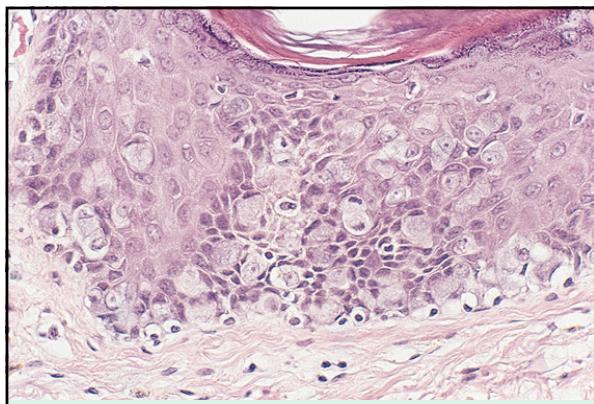

Intraductal papilloma

### Breast Cancer Risk Factors

- Age
- Family history
- Menstrual history
- Pregnancy
- Benign breast disease
- Estrogen, BCP, obesity, High-fat diet, alcohol consumption, cigarette smoking

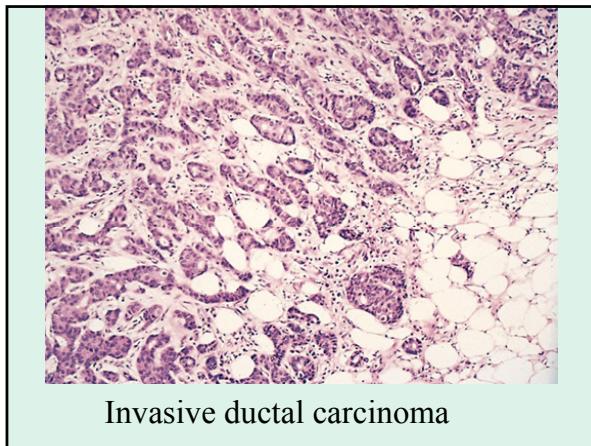

Paget disease

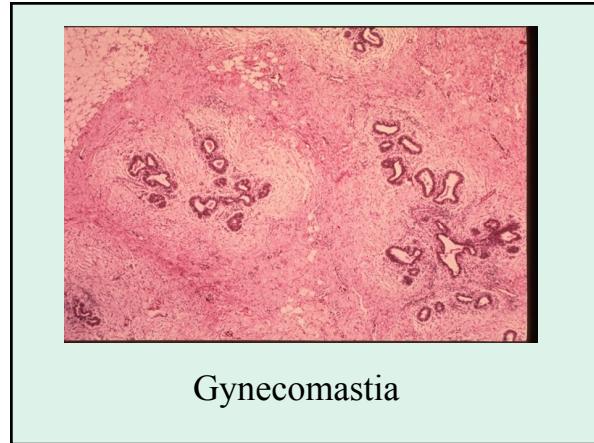

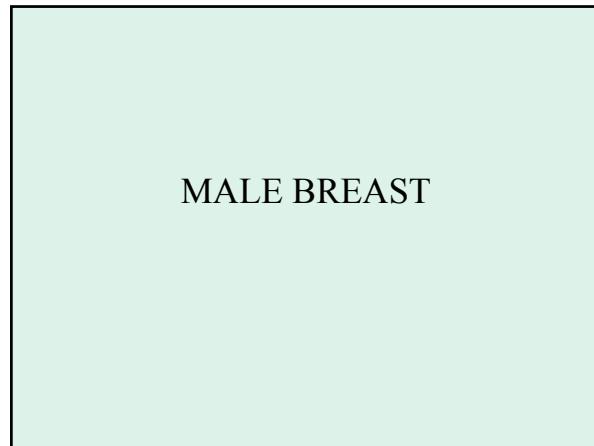

Paget disease of the breast

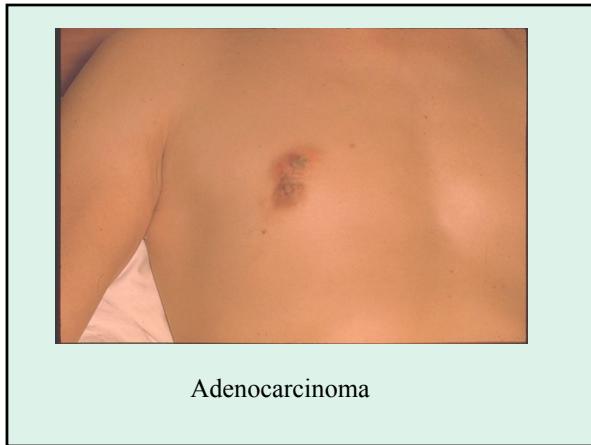

Invasive carcinoma

Invasive ductal carcinoma

Gynecomastia

Adenocarcinoma
